

Slowing Down Pacing Dots

Have your child tap on each dot as they say a word. For longer words you can have him tap out each syllable in the word. If he runs out of dots have him loop back to the start. For younger children don't worry if he is tapping exactly on dot per word. As long as he is getting the idea to slow down and put a bit of space in-between his words then it is working.

Let me know if you have any questions. You are welcome to email me at SLP@Speech-TherapyAtHome.com.

I hope this idea helps.
